Choosing the Right College

Confused about college? Here's your outline of college and education options

Four-Year Colleges and Universities

- Generally, students are enrolled for four years and graduate with a Bachelor's degree.
- Four-year colleges offer a wider variety of academic courses and give students time and opportunities to explore their interests.
- Many larger universities attract the top professors and offer modern facilities and a wealth of academic resources.
- Students acquire and develop skills needed to succeed in the workplace.

Community, Junior Colleges or Two-Year Colleges

- Associate's degrees can be attained in two years while non-degree certificates in specific areas can take less than two years.
- Credits earned can sometimes be transferred to a four-year college so be sure to verify if the credits will transfer if you are interested in doing so.
- Tuition at community colleges is typically less expensive compared to four-year colleges.
- Course schedules are flexible, with day and evening classes offered for working students.
- Community college courses are also available to high school students to get a head start on college and to adult students to further professional development.
- For more information, visit the American Association of Community Colleges at: www.aacc.nche.edu.

Online Schools

Opportunities to study online grow each year. Before signing up, ask yourself the following questions:

- Is it an accredited institution with your program of interest? Demonstrating that your degree is from an accredited institution is important when you're looking for a job or applying to another school.
- · What is the graduation rate of the institution?
- What financial aid is available? Ask the school and check out Fastweb for scholarships: www.fastweb.com
- Do they use full-time faculty?
- What are students doing after graduation? Look for a college that has alumni in established careers.
- How is the program structured? Find out how much interaction there is between student and teacher.
- Is the program run through a traditional college or university? Additional financial aid may be available through the college directly.

Vocational, Technical and Career Schools

- Students enroll in courses for one or two years to learn the skills needed for a specific career.
- Vocational and technical colleges offer certificate or degree programs a four-year college may not.
- Do your research before enrolling by calling the school and asking for proof of accreditation and job placement.

Armed Forces Service Academies

- Qualifications for admission are very competitive.
 They include rigorous physical and academic requirements.
- Students receive a full scholarship upon admission.
- Service time is required upon graduation from the academy (most branches require at least five years of active service).

List of U.S. Military Branch Academies:

Interim Programs

- Explore your interests in a program that takes place in the interim between the end of high school and the start of college.
- · Focus on what you want to do in college.
- Develop independence while working on your own.
- · Build your resume before you get to college.
- Create a network base of varied contacts.
- Check out www.interimprograms.com and ask your high school counselor for more information.
